

TYSILIO SUPPORTS A SUPPLIER IN SENEGAL

Tysilio Solar Station (77 kWp) with storage (100 kVA/110 kWh)

Sindia (Senegal)

KEY POINTS

- ◆ 77 kWp of solar panels
- ◆ 480 m² of ground space
- ◆ 100 kVA /110 kWh **storage system**

LISTEN...

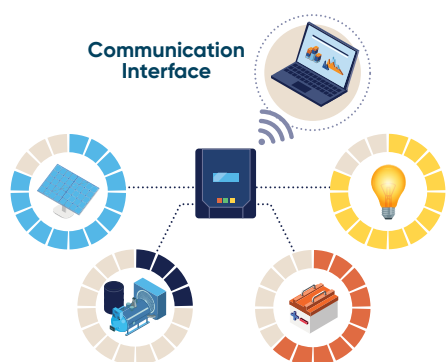

...To our client who wants to equip their new factory with a photovoltaic power plant from the start to reduce their carbon footprint and secure their electricity supply.

ADAPT...

...Our standardized solution by adding a storage solution that allows our client to use the energy produced during the day in the evening and the following morning. He thus becomes more independent of fossil fuels.

DEPLOY...

...A containerized and movable power plant that allows our client to have a solution that is always adapted to his production without permanently immobilizing a parcel of land.

GAIN IN ENERGY

The solution has the capacity to produce 134 MWh of green electricity per year, saving over 40 000 liters of diesel and 101 tons of CO₂ emissions each year.
